Hello,

I am writing to you to ask that you work to support authorization for DEQ to IMMEDIATELY plan for at least 3 more public hearings along the proposed ACP corridor to address the economic development, health, safety and environmental concerns being raised, as well as claims and information submitted by the Atlantic Coast Pipeline (ACP, LLC) since the close of the original comment period. **I have really appreciated the close watch that has been kept in our state up to this point, and ask that the regulatory agencies continue to take a firm as stance against the ACP. Please continue to protect our people, economy, and environment from a project with so many adverse impacts. I particularly would like to know the answers to the requests for more information. One of these areas was asking to clarify the claim that the pipeline will create local jobs and identify specific jobs that will created. The claims of ACP LLC do not match common sense, reports of contractors, and my experience. For example, a contractor said that the companies will hire few local people for permanent jobs. Most income will come from construction workers staying at local hotels and eating at restaurants. Most will be from out of state, which makes sense in a way, as one would hope that the people building such a project would not be newly trained. I also had the experience of being near an area where Dominion was cutting trees for proposed pipeline in VA and none of the trucks were from that state. All of the trucks were out of state and as far away as from Utah, Ohio, Arkansas, Texas. Please carefully scrutinize the true answers to questions about this project and protect the people and the environment of NC.**

Thank you,  
Laure Nyland
